

NATURALIS is partner of LILT Lecce!

TOURIST OPERATORS AND LILT OF LECCE

LILT is committed to provide a First Independent Scientific Research Institute in the Salento area dedicated to knowing and monitoring the quality of the environmental matrices of the territory (water, air, soil, subsoil, food chain, etc.). LILT believes that the health of living organisms is related with the quantitative / qualitative features of the local environment. The name of this project - under construction in Gallipoli area - is "*Centro Ilma*". This Center will be the heart of Oncology Prevention, Rehabilitation and Research

NATURALIS is a LILT partner and supports this innovative project recognizing its scientific and social utility

THE ILMA CENTER Institute of Prevention, Rehabilitation and Research

It is composed of:

- Research Institute for Environmental Oncology
 - *Epidemiology*
 - *Laboratory of environmental matrices analysis*
- Clinical Prevention Institute
 - *clinics specialized in early detection*
- Institute of Oncology Rehabilitation
 - *swimming pool, gymnasium, laboratory, outdoor areas, psychotherapy*
- Study Center with Multimedia Library and Conference Room

The Ilma Center is located in Gallipoli (Alezio-Gallipoli road) on an area of seven hectares of disused quarry in the Mediterranean scrubs with educational, recreational and sports paths open to the public as well

Click and Discover the ILMA Center!

ORGANIZATION: LILT of Lecce

PURPOSES

- Promote the environmental oncology prevention and research on an experimental basis

- Provide health care in the oncology field: prevention, diagnosis, therapy and rehabilitation
- Develop new prevention tools

MISSION

The Ilma Center mission is to promote a Research and Prevention Institute in South Italy. The Center will be a point of reference for human and environmental health by contributing to decrease the incidence of new diagnosis

LILT invests and works in Primary Prevention to protect and promote health and quality of life by reducing risk factors. The tools utilized are information and training in order to raise critical and scientific awareness based on the correct habits and lifestyles as well as the preservation and protection of environmental matrices (air, surface water, aquifers, soil)

DESCRIPTION OF THE PROJECT

The Ilma Center will fund young Researchers of various disciplines such as ecotoxicologists, environmental engineers, epidemiologists and environmental oncologists

The cooperative and continuous work will monitor the health of the population with the health status of environmental matrices

RESEARCH SECTORS FOR PRIMARY PREVENTION

- Epidemiology (Clinical, Analytical, Descriptive and Experimental)
- Environmental Science (Study Center)
- Environmental Oncology (Clinics, Research Laboratories)
- Chemical, Physical and Biological Analysis (Environmental Matrices)
- Health and Environmental Monitoring of the Territory

FUNDING GOAL: 2.000.000 € in 3 years

WHAT WE NEED TO DO TOGETHER

- Completion of Research laboratories
- Endowment of Scientific equipment
- Fellowships to Researchers in the following Field of Study:
Environmental Oncology, Epidemiology, Environmental Science, Ecotoxicology, Environmental Engineering;
- Start-up phase

WHAT YOU CAN DO

Join the campaign "*Open for Holidays: Research on vacation*" by donating only 1 Euro and thus sharing the creation of the "The Ilma Center" for Independent Scientific Research

NATURALIS is proud to support the Ilma Center and the research carried out by LILT of Lecce in favour of the Health and Quality of the local environment

Salento is a land of strong tourist vocation and its safeguard is a social, cultural and economic interest

DONE MORE THAN 1 EURO

Do you want to donate more? Please, contribute with a larger sum!
